

### **Vimar in Milan at Insula delle Rose showroom**

From April, **Vimar** is in Milan at the renowned **Insula delle Rose** showroom. A strategic venue, in the heart of Brera, a place to meet and bring to life bespoke projects. Insula delle Rose, ADI member since 2020, has been collaborating for years with partners renowned across the world and now it collaborates also with Vimar.

In this interesting setting, an area is dedicated to the Linea and Eikon wiring series and to the many other functions of the connected system.

An exhibition that highlights the ability to provide comfort, energy efficiency, and secure solutions, all aesthetically coordinated with the wiring series, making Vimar the ideal partner for any type of project.

Not just a promotional opportunity, also the ideal point of reference to schedule appointments to see and experience the quality of the products first-hand. For Vimar, Insula delle Rose represents a real communication project, a venue of exclusive events within the Brera Design District, one of the various opportunities offered by the city of Milan, including during the imminent Design Week.

We look forward to seeing you in Milan, in Via Goito, 3!
