

Company Profile

Vimar is one of the leading Italian players on the low-voltage electronic and electrical scene.

The company headquarters are located in Marostica (VI), where over 12,000 articles are designed and manufactured, and then distributed across more than 100 countries. 1,300 employees, of whom 1,000 are based in Italy, 9 branch offices world-wide and more than 200 patents registered over the years are the figures which make Vimar a veritable beacon for people looking for top-performing solutions, product quality, technological innovation and bewitching designs in keeping with the latest market trends, capable of catering to all needs in the residential, commercial and naval sectors.

Multiple series of 1-way switches and cover plates, available in a variety of materials and colours, systems for home&building automation, for climate and energy control and management as well as video door entry and CCTV video surveillance systems offer a comprehensive package of integrated solutions.

In 2021, the brand was awarded the prestigious designation of “Historic Brand” by the Italian Ministry for Economic Development, bearing witness to the company’s long tradition and Italian pedigree. In addition, between 2022 and 2023, Vimar received significant acknowledgements for its innovative Linea wiring series, including the Iconic Awards in the “Innovative Architecture” and “Innovative Material” categories, IF Design, Red Dot, and the prestigious Good Design award.

These achievements are the result of the brand’s unwavering pursuit of excellence and the highest levels of quality, an approach underpinned by values such as integrity, loyalty, transparency, responsibility and sustainability. The publishing of Vimar’s first Report on Sustainability in fact constitutes a clear commitment to the future and demonstrates strong governance in terms of value, development and inclusion. In 2024, the brand aims to intensify its efforts further, with the aim of continuously improving sustainability targets in all areas, according to the concept of Positive Energy that drives business actions.
