energia positiva

Idea.
As many solutions
as you have ideas.

Stylish light controls in two designs: Classica or Rondò. Buttons and devices in two colours: white or anthracite grey. Cover plates in four materials and 52 finishes. More than 200 functions for comfort, safety and energy saving, as well as a home automation system that coordinates everything. With Idea the solutions are many, and freedom of choice is maximised. Even your electrical system can be matched to your home decor style.

idea

Classica or Rondò. Anthracite grey or white.

From the rigorous design of the Classica to the rounded contours of the Rondò cover plate. The timeless appeal of anthracite grey buttons or the modest sobriety of white buttons. A highly colourful light control which makes its presence known. Or a solution which blends in with your interior colour scheme. With Idea the possibilities are endless: simply mix and match cover plate designs, button colours, materials and cover plate finishes.

Idea Classica

The rigorous design of the Classica cover plate, with anthracite grey buttons.

Idea Rondò

The soft design of the Rondò cover plate, with white buttons.

The right lighting, wherever you are.

Light defines space and marks time. Idea harnesses light in a unique and personal way. Whenever you want to switch on, off or dim the lighting. Whenever you need an emergency hand lamp. Whenever you are looking for a button in the dark, or you need an illuminated pathway. Idea is always with you, and only for you.

Controls

Buttons and devices in one, two or three modules with symbols.

TORCIA, removable hand lamp

Emergency light which can be used as a portable hand lamp in the event of blackouts.

Emergency light

Light for creating illuminated pathways or lighting specific areas.

The climate you desire, at any time.

Getting up in the morning, planning the day, selecting the climate that you want. Idea is always by your side, with user-friendly functions that are straightforward and easy to manage. Browse them just like on a mobile phone, to change the climate of your home. Timer-thermostats for setting the right temperature in summer and in winter. Timer-switches for controlling automation systems. Alarm clocks for wake-up calls.

Timer-thermostat
Self-guided browsing and simple control for the ideal climate.

Thermostat
Daily temperature programming and manual adjustment.

Timer-switch
On/off programming of lighting and electrical appliances.

Your safety and security in every situation.

With Idea your safety and security are always assured by systems that are constantly active. The burglar alarm monitors for intruders by means of presence sensors and perimeter alarms, thanks to the control panel which allows for simultaneous or individual surveillance of up to thirty different areas. Water leaks, gas leaks and blackouts are all under control. Even the mains outlets are protected by safety devices in the event of power surges.

Methane gas detector

Constantly monitors for leaks and, in the event of danger, emits an audible warning and shuts off the gas supply.

Electronic protection devices

Protection devices for the safety of people and home appliances.

Burglar alarm system

Protection throughout the entire home, with individual programming of up to thirty different areas.

Keeping your home under control, at all times.

With Idea your house is always under control: this is apparent as soon as you step through your front door. Compact, simple and intuitive, the control panel functions as both a simple video entry phone and the nerve centre of the home automation system. Using the system is easy: simply browse the touch screen, press a button, activate a remote control, view the room displays. Even when you are far from home, you can keep in contact with By-me simply by sending a text message.

By-me home automation control panel

The heart of the By-me home automation system.
It also functions as a video entry phone with the option of video surveillance.

Touch screen

Simply push a button to control lights, climate, burglar alarm and automated devices.

One light control, many points of view.

An Idea light control that satisfies many points of view. Choose from buttons and controls in one to six modules, with flush mounting installation in a round or rectangular box. Solutions to meet every requirement, in both the domestic and commercial sectors.
