## VIDEOSURVEILLANCE SYSTEMS THAT ARE INCREASINGLY SOPHISTICATED FOR ULTRA-HIGH RESOLUTION MONITORING.

Protecting premises against intrusion from the outside and guaranteeing constant, round-the-clock control: these are the prerequisites on which the Vimar offering of building security products is based.

### > Different products that deliver the same high precision and reliability.

Our videosurveillance offering incorporates a broad range of solutions to meet any installation requirement. Advanced products designed to offer a practical response to the demands of installers and users, with the quality and high performance that Vimar has always guaranteed.

#### Video cameras

For the residential, tertiary and industrial sectors, with fixed focus or varifocal lenses and bullet or dome designs. The range of Elvox CCTV cameras combines simplified installation with high performance, delivering maximum efficiency and total security.

#### DVR / NVR

Various models for recording high-resolution images transmitted from video cameras. Each type offers different performance and signal transmission capabilities: DVRs interface directly with video cameras, whereas NVRs rely on IP technology.

#### Monitors and accessories

The basic kit is complemented by a wide variety of equipment, including customised devices: from monitors and power supplies to transducers, brackets and cases. The package is of superior quality and made to measure for every application and requirement.

### > Two technologies for every type of installation.

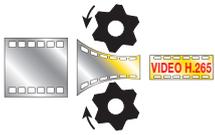

To respond precisely to the different needs of the users who install them, the Vimar videosurveillance offering is available with two different technologies, IP and AHD, both offering high performance and a wide range of solutions in terms of resolution, ease of installation, configuration and management. IP cameras from 2 to 8 Mpx (4K) ensure filming even in very low brightness, offering video analysis functions that scan images to detect abnormal behaviour, as well as H.265 video compression to optimise both data storage space in the NVR and data traffic over the network. NVRs are available with up to 64 channels.

The range of AHD video cameras from Full HD to 4 Mpx combines high resolution with the same easy installation as analogue cameras. Innovative video cameras, easily and quickly configurable by OSD. Versatile and complete solutions designed to keep everything under control with the utmost precision.

**IP technology.**  
Full HD, 2K and up to 5 Mpx  
for maximum performance.

### H.265 video compression.

For optimal management of the enormous data stream originating from the video cameras, in terms of data band, bit rate and space required for recording to HDD. The H.265 technology can transmit videos with 50% the bit rate compared to the H.264 standard.

### Plug&Play configuration.

Simply by connecting the cameras to the integrated PoE switch, the NVR is capable of automatically configuring the addresses of those cameras and sending the video streams to the screen without requiring any further configuration by the user.

### Power over Ethernet.

A range offering quick installation using Power over Ethernet (PoE) that allows the use of a single cable to transmit signals and to power the camera.

### Total visibility.

Wide Dynamic Range technology improves images with strong brightness contrasts, ensuring visibility remains high in the event of strong backlighting.

### Mini Dome cam

With a resolution of 4 Mpx, it is characterized by a sophisticated design and compact dimensions, suitable for both indoor and outdoor installations even in hard conditions thanks to the IK10 certification. It has an integrated environmental microphone.

### Fisheye cam

It is designed to control large areas and it can be installed on the ceiling and placed on the table for a view of 360 ° and on the wall for a 180 ° panoramic view. Thanks to the powerful "dewarping" algorithm, the image can be set as desired, even from a smartphone.

## New video cameras and new features: even better performance.

### Low Light video cameras.

New 2 Mpx Bullet and Dome cameras for indoor and outdoor applications with 3,6 mm fixed lens and 2,8-12 mm varifocal lens.

They are characterised by high light sensitivity and capture clear images and colours, even in low light conditions. Sensitivity: colour 0,002 Lux; B/W 0,0002 Lux.

### Standard video camera

### Low Light video camera

### Video analysis: new features

In videosurveillance systems, video analysis allows prompt detection of security breaches and suspicious behaviour, to prevent incidents at an early stage. Video analysis automatically generates events and this information can be used to home in on people, cars and other objects detected in video footage, helping to establish what action to take, such as alerting security guards or initiating a recording.

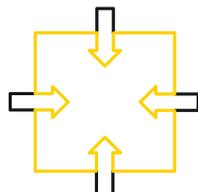

**Video analysis offers many advantages**, such as:

- **Cost reduction and time saving:** less footage is uploaded to the network, which reduces data traffic and storage space and makes monitoring and searching through footage easier.
- **Increased efficiency:** automatic video monitoring detects security breaches and allows the operator to prevent incidents, rather than react to them after the event.

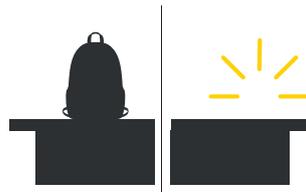

### Video analysis applications

Line crossing

Area intrusion

Left or removed object

Technical faults  
(failure or tampering)

The system records information:

- whenever **a person crosses a line or a virtual area** (defined in the graphic interface);
- whenever **an object is removed from** the camera's area of coverage;
- whenever the **camera has been damaged or is malfunctioning**;

all generated events are communicated to the NVR, which starts recording or activates the alarm.

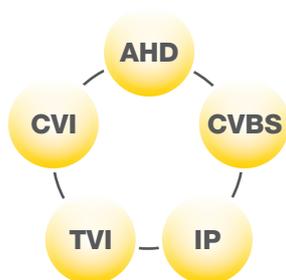

## AHD technology. Ultra-high resolution analogue up to 4 Mpx.

### High resolution over long distances.

Cameras with 4 Mpx (2560x1440 pixel), 3 Mpx (2048x1536 pixel), 1080p (1920 x 1080 pixel) and 720p (1280 x 720 pixel) resolution, for transmitting 4 Mpx HD resolution signals with no latency over distances of up to 400 m (720p) using a standard RG59 coaxial cable.

### Multi-technology AHD DVRs

The multi-technology DVR enables the possibility to select the input technology for each channel between: AHD, CVBS, IP, TVI and CVI.

The AHD 4 Mpx and 1080p DVR enables also the connection of additional IP cameras to hybrid channels.

### Easy to configure.

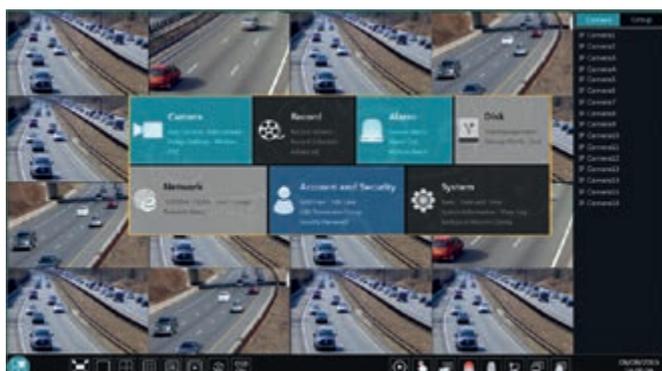

The functions are already preset to achieve perfect visibility in all conditions. The 1080p video cameras fits to the cable an AHD/CVBS to make installation easier. The 4 Mpx, 3 Mpx and 1080p video cameras can be configured via the OSD control fitted to the cable or directly through the 4 Mpx and 1080p DVR interface, by means of the new CsC (Control on Coaxial) function.

### Wide range of lenses.

A complete range of fixed focus and varifocal Bullet and Dome cameras with easy access to zoom and focus controls, as well as new fixed focus 2,8 mm and varifocal 2,7 to 13,5 mm video cameras. The DVRs all have a professional Hard Disk from 1 TB, record in up to 4 Mpx resolution, and can be controlled from home automation systems (e.g. By-me and Well-contact Plus KNX) using the CCTV Controller application.

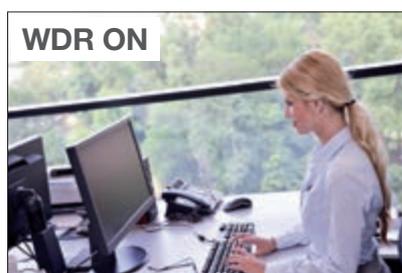

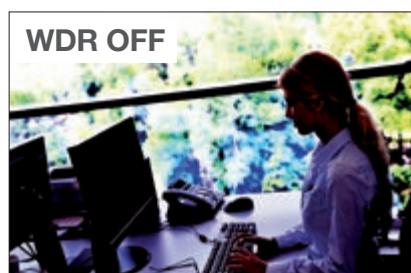

### DVRs with new user interfaces.

The AHD 4 Mpx DVRs come with a new, more modern and practical graphic interface, just like the IP range NVRs.

### Total visibility.

WDR and 3DNR, configurable functions guaranteeing perfect visibility and well-defined contours, correcting images in the event of strong backlighting, overexposure or darkness.

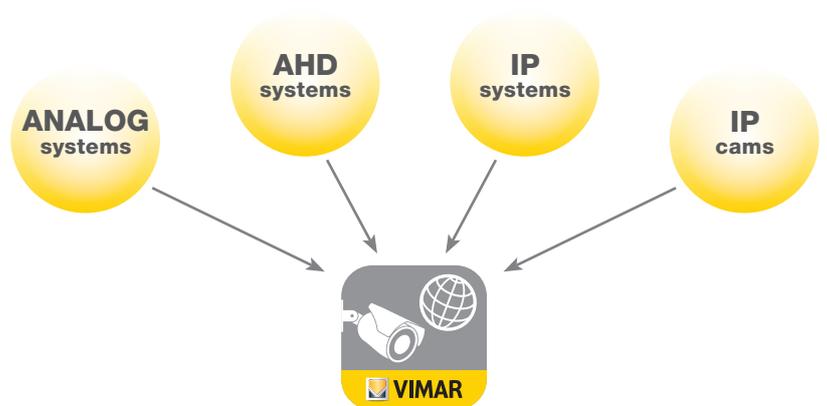

## NEW BY-CAMERA APP, FOR AHD AND IP SYSTEM VIDEOSURVEILLANCE.

The **By-camera** app manages new and existing CCTV systems, both IP and AHD technology.

### Customisable app.

From the app it is possible take action on the settings of DVR / NVR video recorders and create favorite screens. The favorite screens can be made in a single screen with video streams coming from different systems of different technology: analog, AHD, IP and IP cameras.

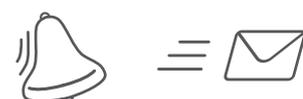

### Vertical and horizontal orientation.

The app works both on smartphones and on tablets, and visualizes the screens both vertically and horizontally, to allow an optimal view of the shots.

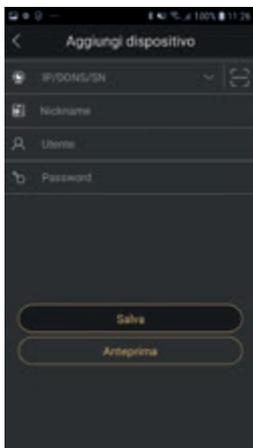

### Notifications

By the app, you receive in real time the notifications about the events on your smartphone and by e-mail.

**By-camera** app, available for iOS and Android systems downloadable from Apple and Google Play stores.

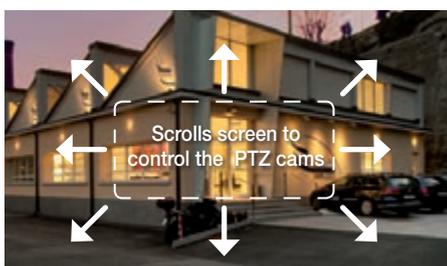

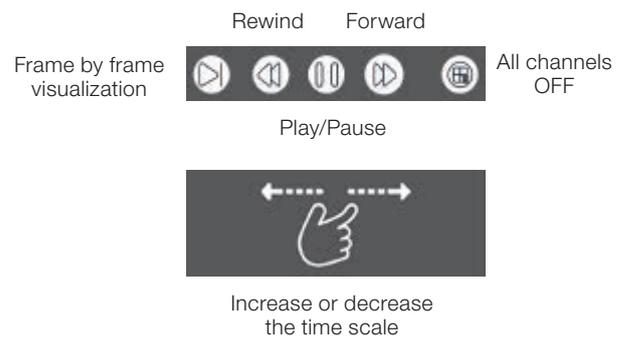

IP STATIC

**Immediate connection.**

Immediate access to the system, remotely and without router configuration. It is necessary to scan the QR-code by the app to visualize the video streaming of the cameras. In the advanced mode, it is possible to enter the IP address both static and dynamic and the configuration of own router.

**Simplified playing.**

It is easy to navigate through the recordings thanks to simple and intuitive interface, from the time scale differentiated for event to the definition of the color.

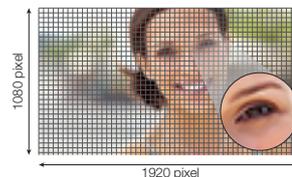

**Cams remote control.**

From smartphone it is possible to control and operate the motorised and the PTZ cameras.

## RANGE OF MONITOR. HIGH QUALITY OF VIEWING WITH HD AND FULL HD RESOLUTION.

Professional monitors suitable for intensive use are available in sizes from 19,5" to 23,6" with 16:9 aspect ratio. Versions that support HDMI, VGA and CVBS BNC connections, to use for videosurveillance systems integrating AHD and IP technology.

### > Energy rating.

The new range of monitors have an A-class energy rating.

### > Full HD resolution.

19,5"/23,6" monitors with Full HD resolution (1920 x 1080 pixel).

## THE QUALITY OF OUR SYSTEMS IS BASED ON A COMMON PLATFORM.

Whether IP or AHD, all Vimar videosurveillance solutions are underpinned by a series of common features that make them highly effective, easy to use, quick to install, flexible and versatile, thus ensuring a better quality of life and better work results.

### > **Plug&Play configuration.**

No configuration is required for any of the technologies. Easy installation guaranteed, for every technology.

### > **QR Code.**

Immediate remote access from your DVR/NVR via tablet and smartphone. Simply scan the QR Code using the dedicated App and you can access the camera video streaming from anywhere, without having to configure the router.

### > **CVM Software.**

One single centralisation software for remotely monitoring and managing up to 256 DVR/NVRs of all four Elvox TVCC technologies

### > **Multimedia Video Touch Screen 10".**

All Elvox CCTV technologies are managed from the Multimedia Video Touch Screen used in home automation systems (By-me and Well-contact Plus KNX).

### > **Continuous security.**

Every DVR/NVR has a specific hard disk for videosurveillance applications, designed for continuous operation, 24 hours a day, 7 days a week.

## SEAMLESS COMPATIBILITY HAS ITS BENEFITS.

The extensive range of Elvox CCTV products integrates perfectly with other Vimar security systems, so that homes are protected against intrusion and unwanted access, safe from environmental damage and responsive to technical alarms - because your safety and security are our highest priority.

### > **By-alarm - Professional and highly flexible anti-intrusion system.**

Thanks to the By-alarm intrusion detection alarm system, protecting spaces against intrusion and developing a solution that mirrors everyone's real protection needs is easy and intuitive. Available in the standalone version, and easily expandable with a vast range of devices. Its high quality is assured by CEI EN 50131 certification (Grade 2).

By-alarm Manager app

Video Door app

### > **Elvox door entry systems, in tune with the future.**

Advanced solutions based on innovative technology that ensure security and clarity, simultaneously combining user-friendly operation with a system that is simple to install. Not to mention a sharp focus on design and typically stylish Italian production, which provides essential added value. With Due Fili Plus technology, there is scope for the creation of systems handling up to 484 entrance panels, 6400 indoor units and 128 porter switchboards. Audio and video signals are reproduced with ultra-high fidelity up to a distance of 1200 metres between the entrance panel and indoor station.

IP technology enables it to go beyond the limits of traditional video door entry systems. Performance is enhanced, and audio and video signal quality is guaranteed and protected, whatever the size of the building complex. For efficient, high-performance communication.

## > Elvox gates - Motors for gates and shutters.

An extensive range of automation systems for sliding or swing gates, up-and-over doors, road barriers, rolling doors and roller shutters.

Elvox automatic gate systems have been designed to give the best in terms of quality, performance and safety. All products comply with European safety standards and further benefit from the use of materials that guarantee high performance levels and durability, a design that enhances the product's aesthetic appeal and the application of precise and reliable mechanics. For truly perfect access control.

By-gate app

By-gate Pro app

## > By-me: automation for the home and small tertiary sectors.

By-me is automation according to Vimar: a range of smart, intercommunicating products designed to improve everyday life, reduce power consumption and perform complex operations with minimal user intervention.

Inside an automated building, the various functions communicate with each other in a comprehensive and continuous way, offering countless possibilities to facilitate both large and small daily actions, while ensuring even greater energy efficiency, safety, comfort and control.

# VIEW: VIMAR ENERGY on the WEB.

## Smart products and interconnected systems.

What is VIEW? VIEW is a range of stylistically matching smart products and interconnected systems that are also compatible with other manufacturers' products, all conceived with the aim of increasing simplicity for users and offering them an intuitive experience, working towards total control of their homes and a smart lifestyle.

In line with this premise, VIEW is Vimar's vision of the digital world and of the Internet of Things, which forms the guiding principle for the ongoing development of smart solutions, all connected to each other, to the Internet and to the user by means of state-of-the-art digital technologies. VIEW looks to the future, today.

### Full control via APP.

All you need is your smartphone to manage and supervise your home and the objects in it, easily and instantly.

### SOLUTIONS OFFERING COMFORT, SAFETY AND ENERGY EFFICIENCY

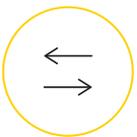

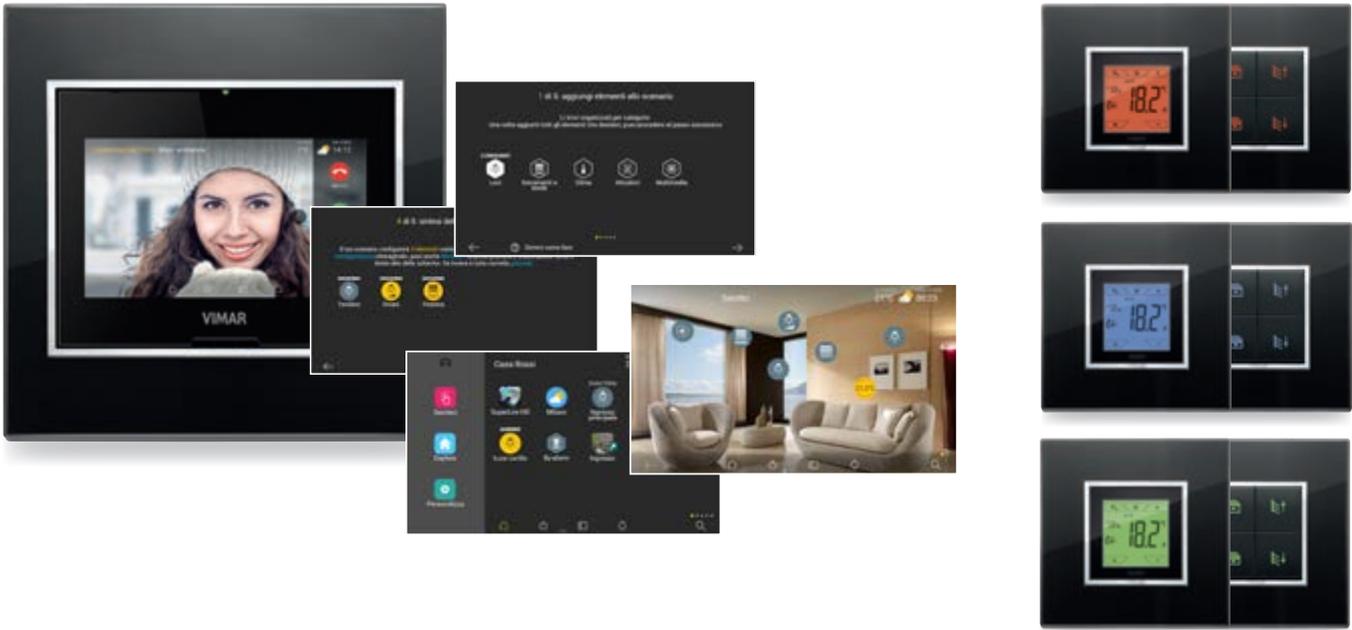

Effective, complete and suitable for all types of buildings, the solutions supported by View have been designed to provide maximum comfort and security. And all while ensuring the highest level of energy efficiency.

### STYLISTICALLY MATCHING PRODUCTS AND USER INTERFACES

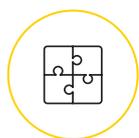

As with all Vimar products, View solutions are aesthetically coordinated right down to the last detail, in line with our philosophy that technology and style should always go hand-in-hand.

### INTEGRATION BETWEEN VARIOUS SYSTEMS FOR A SINGLE USER EXPERIENCE

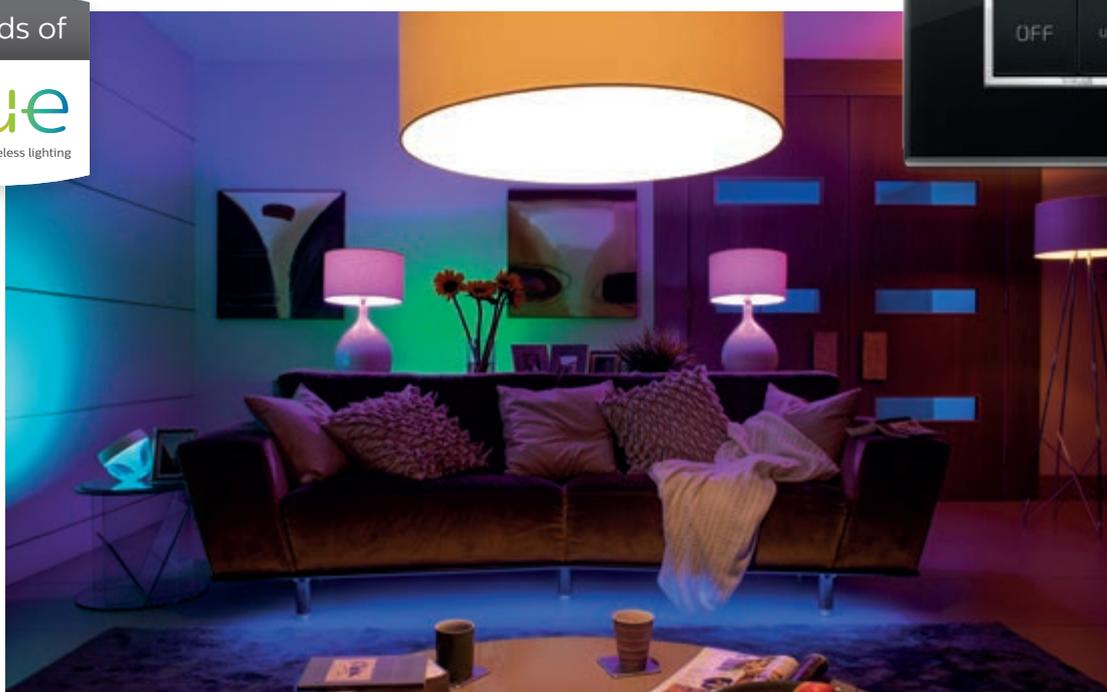

Smart products and interconnected systems also integrate seamlessly with products by other manufacturers, thus making life easier by providing a single user experience.

### PARTNERSHIPS WITH STANDARD PROTOCOLS AND THIRD-PARTY SYSTEMS

In order to offer a comprehensive, fully integrated service, maximum synergy and partnership between Vimar protocols and those of leading brands in other production segments are guaranteed by specific international standards.

### ADDED VALUE SERVICES

Vimar supports sector professionals through training courses, dedicated technical assistance, a toll-free phone number and personalised consultancy services. These activities are aimed at increasing the levels of expertise, safety and quality in their work.

# Videosurveillance system

## General features

### CVM control software

CVM-ELVOx (Central Video Management) software is an advanced application for centralised monitoring and management of DVRs and NVRs.

This software makes it possible to monitor up to 256 DVR/NVR machines over the local network or Internet, even with mixed technology (AHD-IP), via an interface that is fully configurable according to the user's needs.

The user interface provides access to all DVR/NVR configurations:

- enable and adjust motion detection features;
- manage time settings and recording modes;
- export footage;
- manage user permissions etc.;
- alarm notification system with pop-up windows showing footage from the camera affected;
- flexible choice of layouts;
- use graphic maps to personalise and facilitate the effective monitoring of very large premises, or the centralised monitoring of remotely dispersed sites by a single operator.

### Operating system requirements:

Windows 7 (32bit/64bit, SP1 support), Directx 11.0 or later  
Windows 8 (32bit/64bit), Directx 11.0 or later

### Hardware requirements:

CPU	Intel Core Duo, 2,6 GHz or higher
Memory	2 GB or more
HDD	250 GB or more
Graphics card	Dedicated graphics card 512 MB graphics memory or higher

## Installation examples

# Videosurveillance system

## Function

**Multi-window management:** the multi-monitor client system allows multiple windows to be displayed at the same time, increasing the number of viewable cameras and enabling simultaneous management of maps, video playback and settings.

**Live viewing:** display up to 100 video cameras from multiple DVRs/NVRs in a single window, control PTZ via the LIVE interface by means of manual movements or adjusting preset positions.

Video cameras can be organised into logical groups for easier management (e.g. "Perimeter cameras", "Goods unloading area", etc.).

The image quality of the primary and secondary stream can be changed to adapt to bandwidth requirements.

The software can be programmed to display individual cameras or groups of cameras cyclically without the need for operator intervention.

If an alarm event occurs, a full screen pop-up will appear with images of the video camera that triggered the alarm.

Images can also be captured using the "snapshot" function during live video playback.

**Two-way audio:** the operator can open a speak/listen audio channel with the DVR/NVR over the IP connection, with independent activation of transmission and reception. This function can be used to interact with a local operator or broadcast messages over a PA system by activating a connection with the audio input and output of the DVR/NVR.

**Remote control of DVR/NVR digital outputs and inputs:** the graphic interface can be used to remotely activate - both automatically and manually - the digital outputs of the DVR to remotely operate devices, such as turning on lights or opening access points.

**Device management:** add and remove devices via the CVM application, either manually or by automatically searching for devices connected to the internal network. Modify device

characteristics (such as network settings for all devices, image settings for video cameras, and recording and motion detection alarm settings for DVRs/NVRs), either centrally using the CVM dashboard or by adjusting the internal configuration parameters of the device itself. It is also possible to create and modify the parameters of camera groups to provide timed panoramic playback of selected cameras, all within the same window.

**Graphic maps:** insert graphic maps specifying the positions of cameras and sensors controlled by the DVR, in order to clearly identify the field of coverage. Alarms are indicated by the flashing of the corresponding camera/sensor icon and a pop-up window showing a live image of the event. In addition to zooming in on the map, a hierarchical view of multiple maps can be created to obtain more detail.

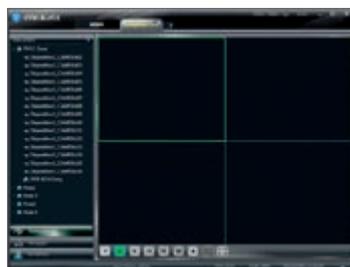

**Footage recording:** digitised video streams from each source can be recorded to a local or network disk. Recording is programmable and can be scheduled to perform centralised backup of multiple devices, thereby allowing a redundant copy to be created for security purposes.

**Footage playback:** simultaneous playback of up to 25 channels in sync with each other, including from multiple devices. Footage searches can be performed by time period or by retrieving the alarm event (motion detection or alarm input) from the logs list. To facilitate searching for events, alarms on the video stream are colour coded: green for data from manual recordings, yellow for footage recorded following a movement event, blue for scheduled recordings, and red for recordings triggered by an outdoor sensor.

**Manage multiple accounts:** create unlimited user profiles in the system, each with customised access permissions (show or hide certain devices, graphic maps, lock access to recordings or to PTZ controls, etc.). In addition, user operations are logged under the user's account name (live view, PTZ control) for a configurable period.

### TVCC AHD kit - 4- and 8-channel

#### 46550.412B

TVCC kit with:

- 1 46540.F04: DVR AHD **4-channel** HD or Full HD Real Time, H.264, 1 TB professional
- 2 46512.036B: Bullet AHD **Full HD 1080p** cameras, **3,6 mm fixed lens**
- 2 46902.015: 12 Vdc plug-power unit
- 1 RT03: 'Area videosorvegliata' warning sign

#### 46550.412C

TVCC kit with:

- 1 46540.D04: DVR AHD **4-channel** 4 Mpx or Full HD Real Time, H.264, 1 TB professional
- 2 46512.028C: Bullet AHD **3 Mpx** cameras, **2,8 mm fixed lens**
- 2 46902.010: 12 Vdc plug-power unit
- 1 RT03: 'Area videosorvegliata' warning sign

#### 46550.816C

TVCC kit with:

- 1 46540.D08: DVR AHD **8-channel** 4 Mpx or Full HD Real Time, H.264, 1 TB professional
- 2 46516.212C: Bullet AHD **3 Mpx** cameras, **2,8-12 mm varifocal lens**
- 2 46902.010: 12 Vdc plug-power unit
- 1 RT03: 'Area videosorvegliata' warning sign

#### 46550.816B

TVCC kit with:

- 1 46540.F08: DVR AHD **8-channel** HD Real Time, H.264, 1 TB professional
- 2 46516.212B: Bullet AHD **Full HD 1080p** cameras, **2,8-12 mm varifocal lens**
- 2 46902.015: 12 Vdc plug-power unit
- 1 RT03: 'Area videosorvegliata' warning sign

# Videosurveillance system

## Cables

**0002.060.E**

75 ohm coaxial cable, ø 3 mm, with PVC sheath, CPR Eca class, suitable for installation with I Category power supply cables (U0 = 400 V), grey - 200 m reel

**0002.063.E**

Cable for video systems, 2x0,35 mm<sup>2</sup> + 75 ohm coaxial cable, with PVC sheath, CPR Eca class, suitable for installation with I Category power supply cables (U0 = 400 V), grey - 200 m reel

**0002.163.E**

Cable for video systems, 2x0,75 mm<sup>2</sup> + 75 ohm coaxial cable, with PVC sheath, CPR Eca class, suitable for installation with I Category power supply cables (U0 = 400 V), grey - 200 m reel

**46364.E.100**

Coaxial cable for underground laying, ø 3,3 mm, with LSZH sheath, CPR Eca class, suitable for installation with I Category power supply cables (U0 = 400 V), brown - 100 m reel

**46364.E.500**

Coaxial cable for external laying, ø 6,3 mm with LSZH sheath, CPR Eca class, suitable for installation with I Category power supply cables (U0 = 400 V), brown - 500 m reel

### Max recommended transmission distance

Resolution	Coaxial cable			Network cable		
	RG59	0002.163.E (coaxial+supply)	46364.E.100 (3,3 mm high quality coaxial, internal)	46364.E.500 (6,3 mm high quality coaxial, external)	Passive Balun (analog range)	Active Balun (analog range)
AHD 720p	400 m	40 m @ 700 mA (limit by supply)	270 m	500 m	200 m	Not allowable use
AHD 1080p	250 m	40 m @ 700 mA (limit by supply)	160 m	300 m	100 m	Not allowable use
3 Mpx	200 m	40 m @ 700 mA (limit by supply)	120 m	250 m	100 m	Not allowable use
4 Mpx	200 m	40 m @ 700 mA (limit by supply)	120 m	250 m	100 m	Not allowable use

If the limit distance is exceeded there is a progressive degeneration of the signal quality.

## Videosurveillance system

### Passive transducers (AHD)

**46862.B02**

Pair of passive transducer for video transmission on twisted cable, BNC connectors for camera or DVR connection, one transducer with 14 cm of cable, screw connection for cable

### Keypad for PTZ and DVR control

**46916.005**

Keypad for Speed Dome cameras control, 3-axis. Pelco D, Pelco P protocols. Supply unit 12 Vdc 2 A (provided).  
Dim.: 220x130x90 mm

**46916.004**

IP keypad for PTZ control, it controls simultaneously 10 devices, 3-axis control. Supply unit 12 Vdc (provided).  
Dim.: 41,7x26,5x17,5 mm

### Power supplies

**46902.010**

Switching-mode power supply unit 100-240 Vac 50/60 Hz, with Europlug 2P plug and jack 12 Vdc 1 A, 12 W max power

**46901.015**

Switching power unit, for flush mounting, power supply 100-240 Vac 50/60 Hz, 12 Vdc 1,5 A jack, max power 18 W

## Videosurveillance system

### Brackets and supports for AHD Bullet and Dome cameras

**46922.015**  
Bracket with contacts box for fixed and varifocal Bullet AHD video cameras for surface mounting or ceiling mounting

**46922.018**  
Bracket with contacts box for varifocal Dome AHD video cameras for surface mounting or ceiling mounting

**46917.004**  
Pole bracket for fixed and varifocal AHD video cameras

### Brackets and supports for IP Bullet and Dome cameras

▲ **46922.012.01**  
Bracket with contacts box for varifocal IP Dome video cameras for surface mounting or ceiling mounting

**46922.013**  
Bracket with contacts box for varifocal IP Bullet and fixed Dome video cameras for surface mounting or ceiling mounting

**46922.014**  
Bracket with contacts box for IP Bullet and Dome fixed and varifocal video cameras for surface mounting or ceiling mounting

**46917.002**  
Pole bracket suitable for Speed Dome (PTZ) and Bullet IP

### Brackets for IP Fisheye cameras

▲ **46922.019**  
Staffa con scatola contatti per telecamere IP Fisheye per fissaggio a parete o soffitto

# Videosurveillance system

## Types of installations: TVCC AHD systems

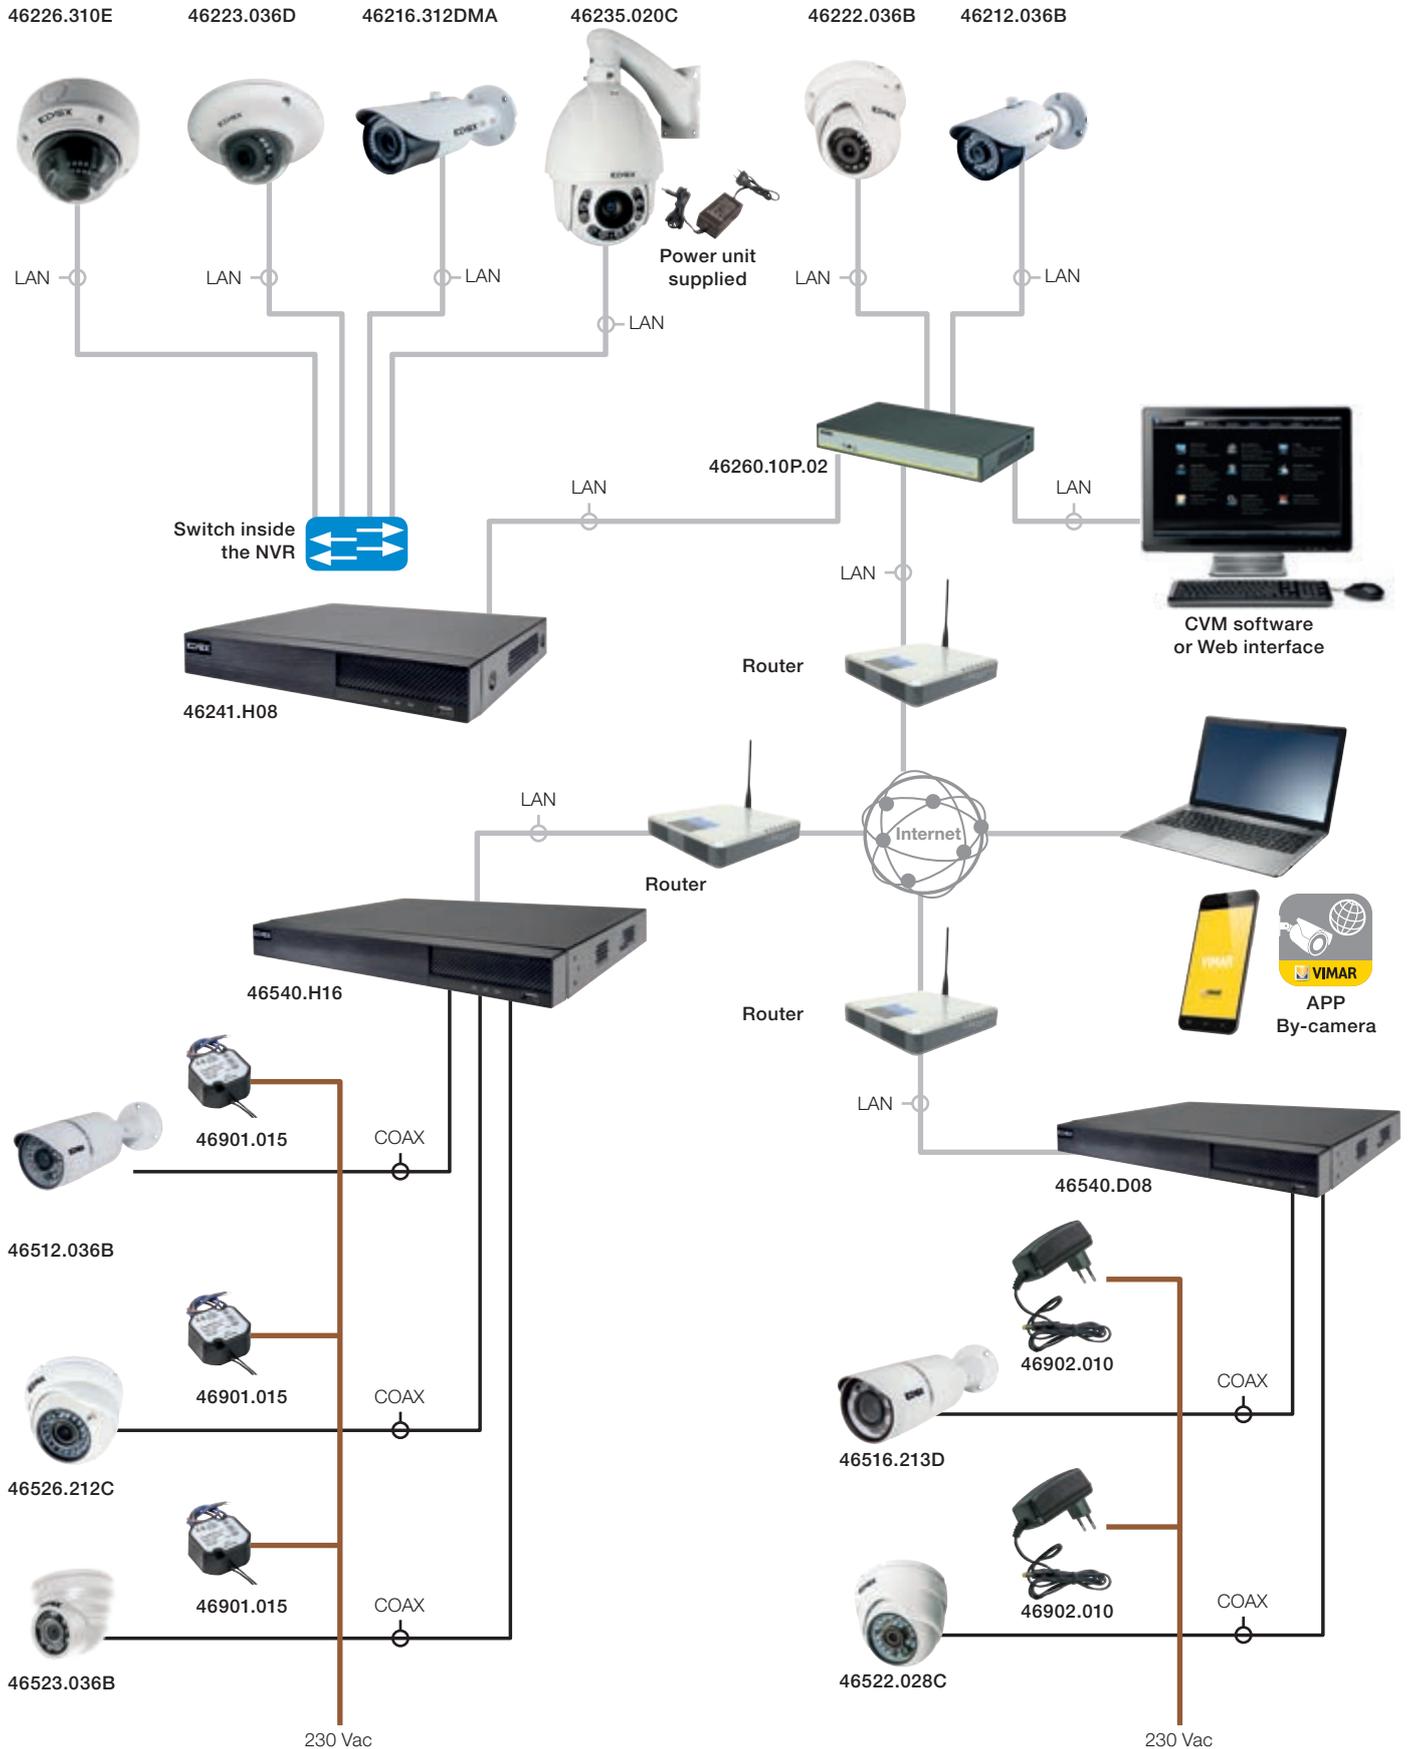

The example shows an AHD CCTV system with slewing control.

# Videosurveillance system

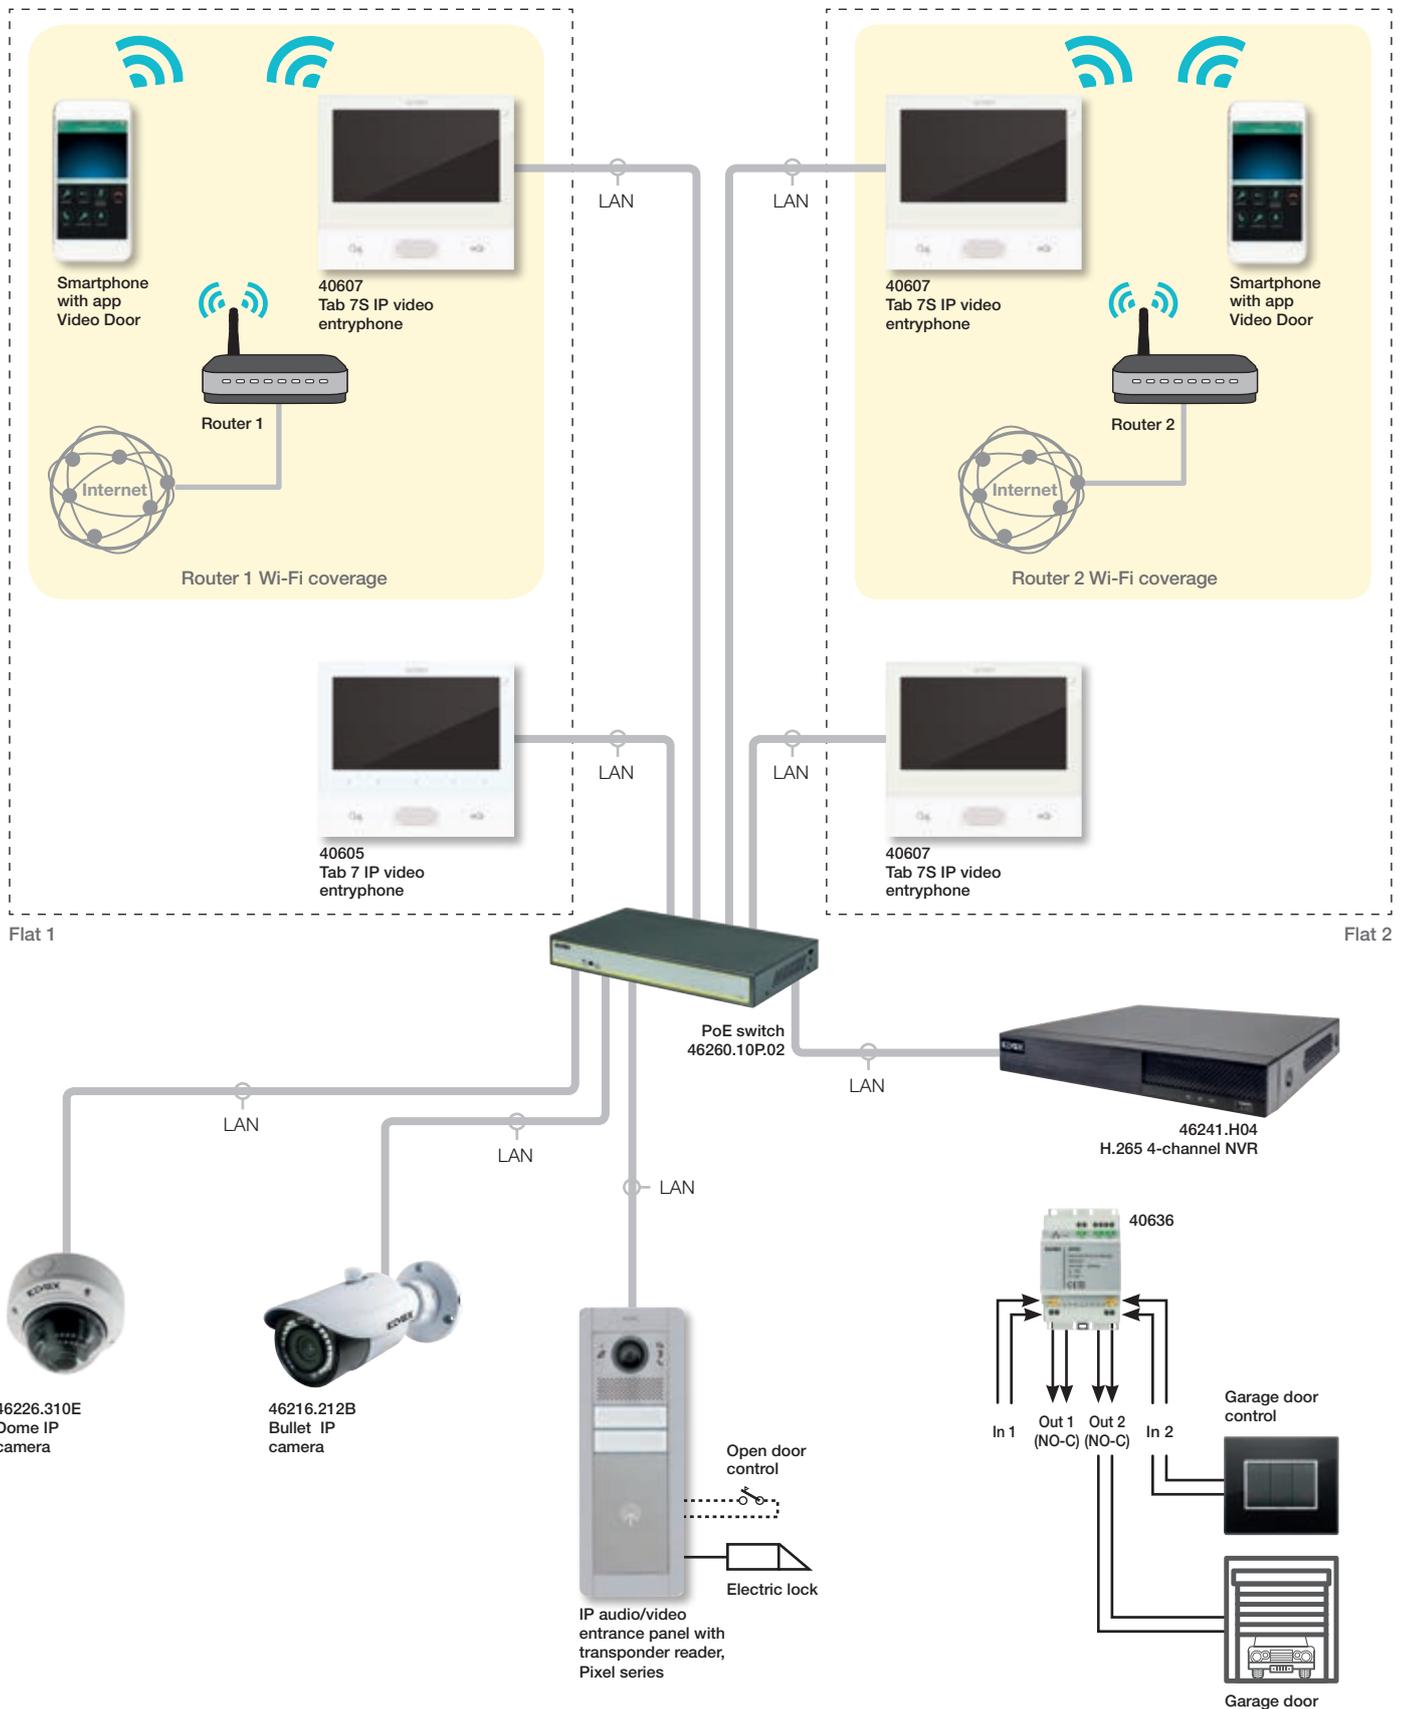

## Types of installations: CCTV system mixed IP and AHD

The example shows a CCTV system with the integration of AHD and IP technologies and centralization with DVR/NVR.

# Videosurveillance system

Types of installations: CCTV system integrated with the video door entry system

**Note:** example based on LAN network dedicated to the video door entry system. The passive cabling system and the active devices can change according to the type of the established network for the specific application.

# Videosurveillance system

## Types of installations: CCTV system control from By-me and By-alarm systems

The example shows a CCTV system realized with IP cameras connected to an AHD DVR and Wi-Fi router by means of a switch.

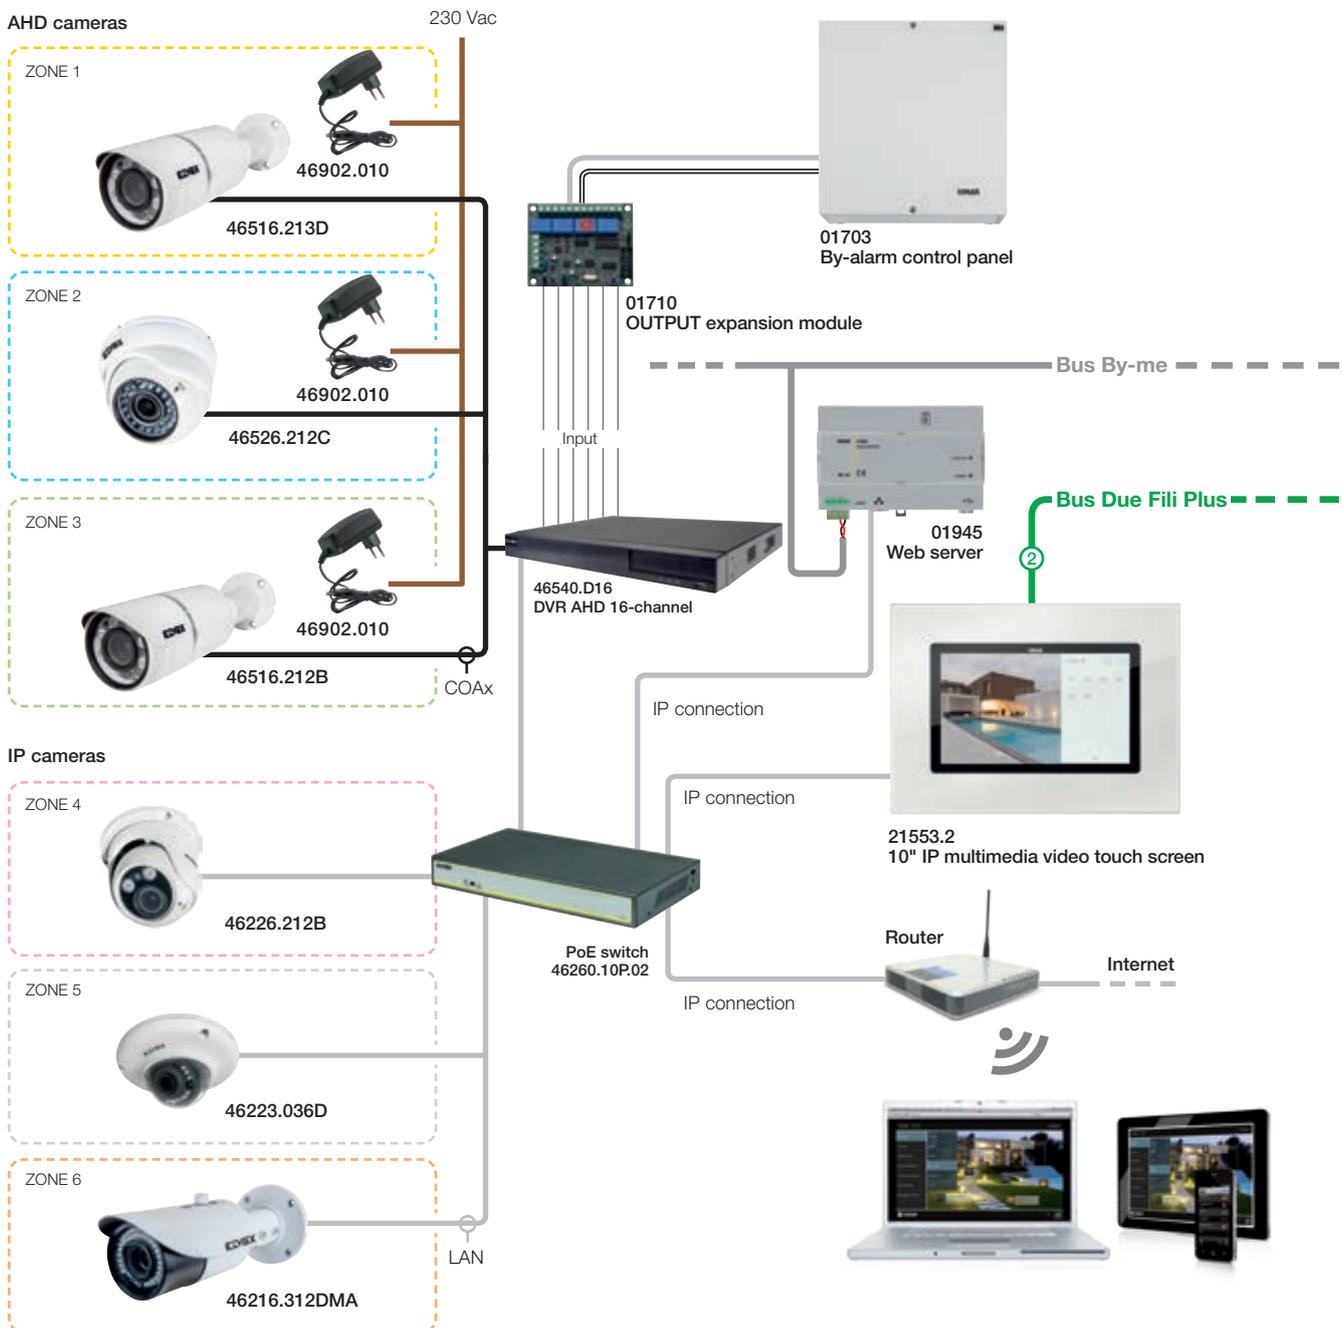

The IP 10" multimedia video touchscreen, where the CCTV Controller is installed, enables the visualization and control of the IP cameras connected to Wi-Fi router.

In addition, through the "Telecamere" application it is possible displaying the images filmed from Due Fili Plus flush mounting cameras (1-module or 2-module) o from entrance panels.

Through the router, the images filmed from IP camers can be

displayed into the smartphone or tablet, as long as they are provided of Superlive Plus app or into the PC provided with an internet browser.

In the system, the By-alarm control unit (01703) by means the OUTPUT expansion module (01710) is connected the DVR, when the By-alarm system detects an intrusion in the zone 2, an alarm is activated and the DVR will activate the recording of the images.
