

POSITIVE CONNECTIVE

Transform your Energy.

When you touch a switch,
we are sensing the presence of others
with meaningful intensity.

As a **CONNECTIVE** tissue does.

We take part in a building-lexicon
of gestures talking of the humanness:
a **POSITIVE** sign of our existence.

BEAUTY ENERGY LIFE

Living, we are tied to a place. We are part of a binding that supports languages, spaces and times.

We act through minimal actions, subtle glances, barely hinted desires. **Ours is a work on the places of relationships.** From the way we live in spaces to the way we observe objects and touch screens.

Vimar interfaces and systems connect lives in **residential, hospitality, nautical, working** and **public places, health and culture.**

BEAUTY ENERGY LIFE

Since 1945 our energy is driven by passion and are engaged in supporting the evolution of living styles. The heart of our company, where we create, design, manufacture and test all our products, is in the North East of Italy. We continue manufacturing here at Marostica: from materials to shapes, colour combinations to electronic processes, we are distinguished by quality, style and technology that speak our language all over the world. A long tradition and history of success, a culture based on solid and true values.

*Over 1300 people
100 different countries
9 subsidiaries and
10 direct local presences*

A new logistic and production hub, since 2019, in Marostica.

The new warehouse is fully automated with cutting-edge logistics technology. An ambitious project covering a total area of 70,000 square metres, with more than 7,000 sq. m. of green areas, partially open to the public, with a children's playground.

It has been designed in compliance with the latest environmental sustainability standards: a photovoltaic system, a geothermal system combined with 48,000 square metres of radiant floor heating, which ensures 40% primary energy savings; a Smart Metering system allows energy data to be acquired, analysed and managed in real time, thus optimising the use of these systems and reducing consumption by 10%.

*We are a team of more than **1300 persons** in **Europe, Asia and South America**, ready to satisfy you, our partner, all around the world. With **9 subsidiaries** and more than **10 local direct presences** in the world, we offer our products in over **100 different countries**, with different regulatory standards and different lifestyle, spreading around the world the Italian design and technology.*

BEAUTY ENERGY LIFE

Research. Technology. Simplicity

To ensure the best of technology and design, 6% of our annual turnover is invested in R&D.

This has allowed us over the years to lodge more than **180 patents worldwide**, reflecting the attention of the great innovation like the little details that make **every day life more simple and comfortable**. We firmly believe that **new ideas are created to be shared**.

*We work with
great care of
the environment*

Taking care of the process.

Our manufacturing cycle is characterized by low environmental impact. We recycle 60% of the plastic material waste and most of the metal. We only use water-based paints or UV curing. We are replacing the electroplating bath with the innovative and more environmentally friendly MSD process that eliminates any type of harmful emissions.

All packaging is fully recyclable.

We take great care in respecting the environment in order to grow in time with continuity and shared values. The packaging cases for controls uses GD2 cardboard, which consists of 90% recycled fibre and the material is 100% recyclable. Moreover, the paint is water-based and the colours are made with vegetable oils.

SICURY patent. More than 50 years of invention. Our idea for the SICURY shutter, is a device for ensuring the safety of electrical systems and protecting sockets, by preventing users from making involuntary contact with live parts. We decided to grant all the operators in the industry the right to use our patent free of charge, making SICURY a market standard.

We collaborate with institutes, research centres and business incubators.

An example with the new relay QUID: Its technology is patented and certified by the University of Turin.

quid+

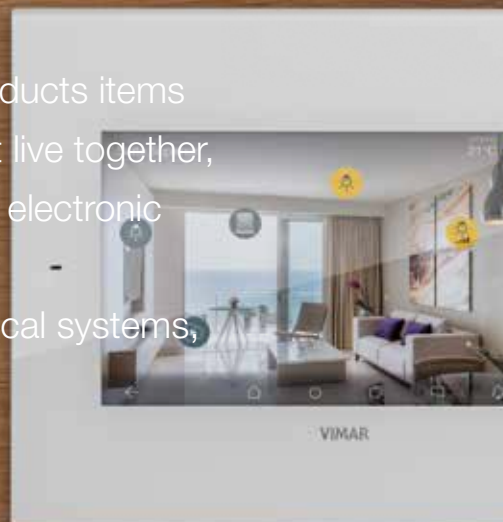

BEAUTY ENERGY LIFE

Our products celebrate the lifestyle evolution.

This allows us to offer finishes and details that make our products items of interior design. Convinced that form and technology must live together, we dedicate time and energy on developing new projects of electronic and electromechanical engineering and materials.

From the simple electrical wiring to the advanced technological systems, we solve, transform and connect your energy.

*You, our partner, our most important designer.
You own a clear vision of your project.
Working together we evolve our knowledge
and thus enhance our common world.*

We work closely with the most famous designers, ensuring we evolve alongside the architectural and living styles.

Our products are the results of this approach: design proposals composed of harmonious geometries and a careful study of the finishes, designed to enhance the look of all environments for best-fitting to your projects.

VISION ECOSYSTEM VIEW

Design integration happens when it enters with simplicity, personal customization and a great standard of service.

View is a vision of platform which includes systems and products connected for new buildings, renovation or upgrade of existing systems.

A set of solutions for comfort, energy efficiency and security, with aesthetically coordinated and personalized products to answer to every architectural environment. The technology By-me Plus with the integration with Elvox Video Door Entry systems, Elvox CCTV, Automation, Burglar Alarm system blend in a unique user experience in the name of simplicity.

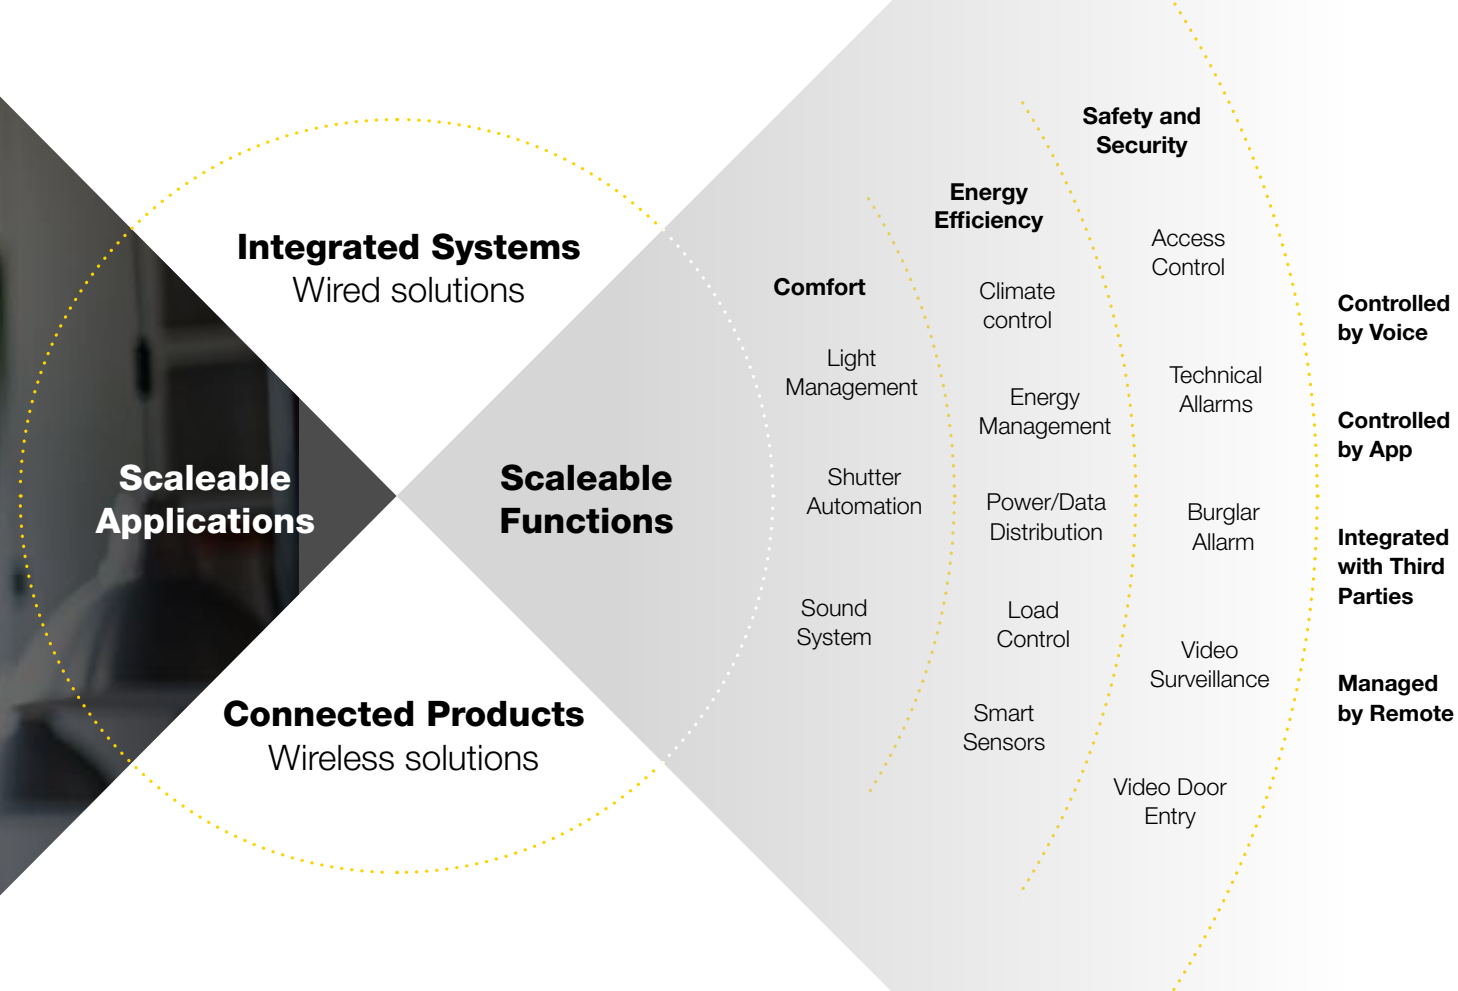

A single app: an unique experience and intuitive interface. You can manage, control and create favourite scenarios using the View app. Integrate the app with the IFTTT platform to integrate with third-party connected devices. Through the VIEW App and Vimar Cloud, you are connected to your spaces from everywhere and you are up-to-date on what is happening inside and outside the building. Simply connected to your own world.

VERSATILE SOLUTIONS

Our solutions respect the identity of every setting. You can smartly, simply and constantly expand your ecosystem for a total home and building control.

From small to large buildings

Eikon. Elegance, excellence, value

For your prestigious projects, touch the experience thanks to various product lines with different dimensions, finishing and functions: **Eikon Exé** with **The Collection** (Vintage and Flat controls), **Eikon Tactil** and **Eikon EVO**. Each detail has been carefully studied to offer its own unique effect.

One platform. Multiple choices. Bespoke Design. Perfect co-ordination.

Eikon Exé

The essence of shapes and materials. Squared corners and striking silhouettes give rise to a range that blends in seamlessly with any environment. Resulting from a meticulous selection process, different top quality finishes, which create a different, original soul each time: glass, leather, mirror, wood, marbled stoneware, brushed, shiny and exclusive metals.

Pure essence

Seven different materials are available in a generous 27 different top-quality finishes, which create a different, original soul each time. To offer an extensive variety of solutions suited to any environment.

Eikon Exé. The Collection

From the essence of Eikon Exé cover plates two new types of control are born: Flat and Vintage.

An even more distinctive exclusiveness for your interior design projects. A bolder identity in accordance with the latest stylistic trends, which propose a come-back of traditional silhouettes and, at the same time, show a preference for linear shapes. Matt White, Anthracite Grey, Brushed Nickel, Brushed Dark Bronze and Gold.

Vintage controls

Vintage toggle switches embrace mesmerising lines of the past restyling them with a modern twist providing an exclusive, slightly retro style. Cover plates can be customized with a precise logo and controls can be elegantly lasered with pictograms to identify all diverse functions.

Flat controls.

Planar and square-shaped controls create a pleasant flush-mounting effect, to emphasise the textured appeal of the cover plate. Provided with personalized RGB backlighting, controls can be elegantly laser-engraved with icons and pictograms.

Eikon Tactil / Eikon EVO

Recognizable at a glance. Every concept of luxury finds its perfect expression in Eikon: technological, chic and sophisticated. Transforming normal everyday gestures into special moments of pleasure. Transmitting unprecedented charisma to any room. Eikon seen in profile, offers a subtly fascinating and impalpable presence, in tune with current interior design trends.

Eikon Tactil.

A technological jewel. The cover plates are available in various finishes including crystal, solid wood, natural leather, carved stone and Corian®. Colour functions can be customized thanks to RGB LED backlighting for home automation systems

Eikon EVO.

Elegant geometries and chromed frame, the design of Eikon capture the latest interior design trends and bring out the best Italian style. Perfect aesthetic coordination with Eikon Tactil.

Arké. Enjoy your living spaces

Arké. Simplicity and character, a perfect match.

Large proportions: large sized surfaces that underline shapes and materials. Two designs. Fit perfectly into your projects. Convex buttons, a pleasant feeling ergonomic shape, only slightly perceptible to the eye, accompanies the controls. Finishes and colours, materials selected to last, colours chosen in harmony with contemporary style.

Arké Classic

rational shape, linear profile and clean corners.

Arké Round

sinuous surface, slightly curved with soft corners.

Arké Metal. The Warm Soul.

Contemporary and attractive, functional and pragmatic with a universal aesthetic. With its warm metallic colours, it's ideal for residential spaces and hotels that like to stand out, starting from style details. With a new, highly distinctive, warm colour for controls, specifically designed to enhance the range, Arké Metal explores original material combinations that complement an ultra-modern, creative energy model.

Arké Metal Classic

rational shape, linear profile and clean corners.

Arké Metal Round

sinuous surface, slightly curved with soft corners.

Plana. Strong universal character.

Essential and linear.

Plana's design stands out for its rigorously shaped corners and modest size. Solutions with a strong formal balance: delicate in white, elegant in glossy silver, Plana perfectly adapting to various environments.

The elegance of metal, the warmth of wood, the modernity of technopolymer and the freshness of Reflex: every interior has its own look, enhanced by Plana.

37 variants to choose from: from classical black and white to natural maple and pear woods, from brilliant metallic green and blue to icy cedar and mint, the assortment is endless.

Personal design products

Wide range of skills, continuous in quality standards and proximal in relationships. Our international support network provides on-the-spot coverage, after-sales consultancy and assistance, wherever you are. A single solution provider.

To promote the identity of the hotel or a working places, all the cover plates can bear its logo, while controls and buttons can be customized based on the chosen function. Indeed, laser technology is used to reproduce any symbol with maximum precision, choosing from an extensive gallery of pictograms that identify the most common functions. Working together, we evolve our knowledge and thus enhance our common future.

We transform your energy

SETTING SOLUTIONS

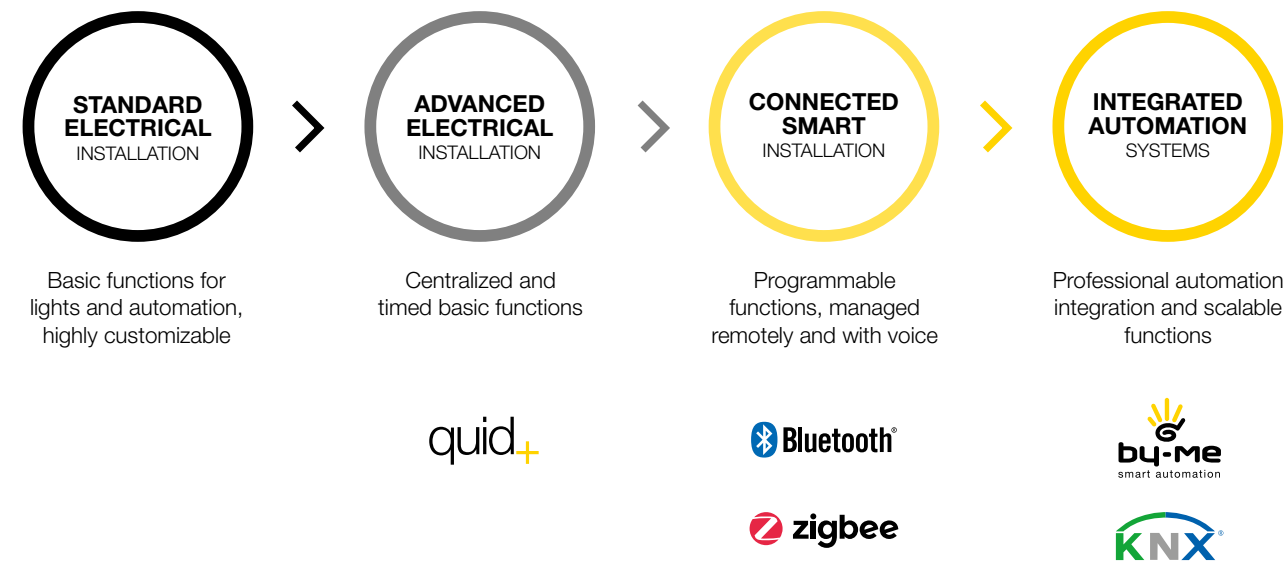

We take care of your projects with simplicity

Wired and wireless solutions. You can smartly, simply and constantly expand your ecosystem for a total home and building control. Versatile technological solutions from standard installation to advanced integration smart systems to fit perfectly into your projects.

Advanced electrical installation

quid+

Innovative for controlling lights and rolling shutters, dedicated to traditional systems. Our expertise dedicated to traditional systems brings to life an innovative with easy and intuitive installation that evolves wired systems for maximum functionality and reliability. A simple solution, ideal at the doorway, on the bedhead of a hotel, in commercial areas, homes and working places.

QUID for lights.
Innovative and silent relay.

**ONLY ONE CABLE
FOR THE CENTRALIZATION
OF ALL LIGHTS**

quid+

Central control.

QUID offers the possibility of realizing a centralized shutdown control. It gives the opportunity of shutting down all lights with just a gesture. Furthermore, the presence of a pilot light reveals if the lighting is active in any other connected point.

More silent.

Differently from the standard electromechanical devices, the change of status turns out to be more silent, thanks to its patented magnetic technology.

Safe.

If the push button remains active, the relay does not overheat because there is no electricity after the change of status.

Energy saving.

It does not consume energy with the lights off.

QUID for roller shutters.
Innovative electronic switch.

Centralized control.

The new switcher, on wired systems, supports the possibility of automating curtains or roller shutters and enabling group control, with disconnection of the load at the end.

Reliable and safe.

It switches off the power at the end to avoid the motor to be in voltage and to be damaged

QUID knows the habits of people.

It memorizes the favourite position of curtains and roller shutters. You can recall it whenever you want.

“That little something more”

Activate princess scenario

Connected smart installation

The new View Wireless devices designed for Eikon, Arké, Plana and Idea can manage lighting, roller shutters or motorised curtains, control energy consumption and manage scenarios, with the utmost simplicity using classic 1-way switches, via app or directly by voice. View Wireless can be adapted to any architectural context. Update, extend or replace your wiring system, you have the chance to make your home match, integrable over time. It is also ideal for renovations or to boost the functions of an existing system, and it is a useful means of support for the elderly and people with restricted mobility.

DUAL INTELLIGENCE. DUAL TECHNOLOGY

Update your space simply.

Just a few tasks.

No need for masonry work.

New system, same shape.

Easier, more functional.

A connected home thus guarantees greater comfort, more efficiency and security both when you are inside your living spaces as well as when you are out of doors, enhancing the value of the property and improving life for those who live there.

Expand your system wireless and stressless

Battery-free radio frequency controls to boost the functions of standard electrical installation.

The radio frequency controls for lighting automation and control are eco-sustainable and reliable. Thanks to the EnOcean and ZigBee Green Power technologies, plus Bluetooth connection, they use the energy generated by the pressure of the keys, avoiding the use of batteries and removing the need for regular maintenance and cable connections. Easy to configure, it can be integrated with the By-me Plus and with the KNX world and guarantees an extensive interoperability with the products of our Partners. Radio frequency also enables the system to be extended to all the areas in which it would be inconvenient or even impossible to intervene and carry out masonry works, so reducing the installation and maintenance costs and ensuring a significant energy saving.

Integrated automation systems

By-me Plus is one of the main systems of the VIEW platform.

Focused on comfort and energy efficiency, it enables the user to control and perform the integrated management of the lighting, curtains and roller shutters, temperature and energy control of the building and the multi-room sound system.

More comfort.

Curtain and roller shutter automation, light dimming, stereophonic sound system

Managing the lighting and the sound system, moving curtains or roller shutters, dimming the light of the various traditional and energy-saving lamps, or creating plays of coloured light. All through scenarios pre-set based on the user's requirements.

By-me Plus is easy installation and advanced technology:

- Bus twisted pair cable
- linear, star and mixed wiring topology
- remote control via IP interfaces
- extendable with radio devices messages to these.

Improved energy efficiency.

Managing energy more responsibly with evolved solutions capable of optimising the consumptions without losing out on quality, generating savings of up to 50% (according to a study performed by Milan Polytechnic University, IoT Observatory and in line with the EN15232 standard).

Management of the loads to prevent blackouts due to over-loading and smart distribution of solar energy. Thanks to the possibility of viewing the consumptions, also remotely using the app, the user will always and promptly be aware of the energy profile of the home.

Temperature Comfortable climate control.

Home energy supervision with measurement and viewing of consumptions (including non-digital ones).

Energy management and optimisation.

Smart management of the energy produced by a photovoltaic system is automatically carried on the appliances already selected, so reducing the amount of power used from the network.

By-me Plus is simple configuration and diagnostics, maintenance thanks to the VIEW Pro app

By-me Plus is smart management of comfort and energy efficiency thanks to the unique VIEW app

Integrated automation systems

Each building has its own special needs, right from the very first design phases. Designed to increase performance, comfort and energy savings, making buildings smarter and increasing their value, this Vimar security and communication systems stand out for the **high level of flexibility and scalability**.

Easy to configure thanks to the professional ETS software distributed by the KNX Association. The KNX devices for building automation can be operated together with all the products of companies that comply with the standard, ensuring a single integrated system that is connected to the world of the IoT via specific gateways or IP web-servers.

Flexibility & scalability.

- Integration with the control devices
- Modular devices with interchangeable buttons customizable with a wide range of symbols
- RGB touch thermostats with over 100 communication objects
- RFID access control reader with programmable entrances/exits
- Perfect aesthetic coordination with Eikon, Arké, Idea and Plana

Wide range of products & functions.

- temperature control thermostats and dimmers
- dimmers for lighting control, scenario automation
- RFID MIFARE access control readers
- presence and light detectors for saving energy

Touch our expertise in door entry

A wide selection of intelligent indoor and outdoor door entry and video entry systems.

Ideal for residential, working and public spaces, tertiary settings, service industry facilities.

High-performance technology that multiplies the solutions. With **Due Fili Plus**, **IP technology** and **SIP** you can easily create even large systems, guaranteeing the highest performance in any type of building, from small homes to large residential complexes. **Complete range.** All products vary in size, design, structure, type of system, functions and installations: they all share high structural quality, attention to design, easy installation and use.

Communicating simply, effectively & safely

Up to 6400 indoor units:

Installations which handle up to a maximum of 484 outdoor units and up to 6,400 indoor units.

Simple programming directly from the indoor panel.

Accessible anywhere via smartphone and tablet.

Combined with the Tab 7S, the Video-Door app can receive the video call, view the video surveillance cameras or open the door, directly from your smartphone or tablet, wherever you are.

Up to 1200 metres.

You can set up huge systems, with a distance between indoor and outdoor panels of up to 1200 metres, without losing any quality of the audio or video signal.

Scalability and versatility. Infinite number of users.

Audio/video communication between indoor and outdoor units becomes multiple and contemporary. Simple, also through the use of existing LAN networks, without laying any specific wiring.

Simple and intuitive installation.

Self-configuring for the kit version or configurable via the Video Door IP Manager software on a PC for the simple and complex installations, all simplified by an autodiscovery function for Elvox IP video door entry devices.

Reliability.

The system data is replicated on the different devices, ensuring constant system operation.

Solutions on VOIP infrastructure

Session Initiation Protocol is the most commonly used protocol in the VOIP telephony business market. It is used to create audio or audio-video communication sessions between one or more participants.

Compatibility with the products of world leaders in the VOIP telephony sector.

Simple configuration. Commissioning can be done simply from any browser, connecting to the WEB server of the device, without the need for specific software.

Call scenarios.

Software licences.

They enable calls from the entrance panel to one or more SIP audio devices or to one or more SIP audio/video devices.

Feel safe and secure into your daily life

Burglar alarm system and high performance cameras, monitors and recorders.

and Suitable for small apartments as well as shopping malls and business centres, up to large industrial companies.

By-alarm. Burglar alarm system.

Protects the spaces from break-ins. Stand-alone and easily integrated with a wide range of devices, the system is expandable and can also be integrated with By-me Plus, for continuous, diffused and intelligent control. This flexibility is ensured by different supports, such as: coaxial cables and IP protocol, linear cable, Bus cable and/or radio frequency (perfect for setting alarms in other areas without having to carry out masonry works). Its quality is ensured by the CEI EN 50131 certification (level 2) and the IMQ- Security systems certification, confirming its total reliability.

Aesthetic coordination.

By-alarm devices, such as sensors, internal sirens and connectors, have been designed to offer the maximum in terms of aesthetics and functionality. Plus, all flush mounting devices are available for the Eikon, Arké, Idea and Plana series. Wide combinations in terms of design, material and colour.

Video surveillance.

The video surveillance systems integrate products with excellent performances capable of guaranteeing reliable monitoring, even in critical areas in outdoors and indoors.

Video cameras with AHD technology up to 5 Mpx per AHD and Low Light IP of 2 and 5 Mpx and up to 8 Mpx, H.265 video compression and new video analysis functions to enable vision in all lighting conditions.

Clear pictures of even the smallest details

Rapid installation and configuration and the possibility of also remote controlling the system via Wi-Fi network, QRCode or CVM software.
